Glen Dimplex Heating & Ventilation

At Glen Dimplex Heating & Ventilation we are committed to supporting the most forward-thinking efficient and sustainable industry-leading brands. With our combined enthusiasm and dedication to developing the very best heating, hot water and ventilation solutions, you can feel assured that the products, services and systems created by our brands are:

Innovative - in their product design, technology and manufacture

Expert - in their application of technical knowledge and industry experience

Proven - from historically defining markets for more than 760 years collectively

Trusted - worldwide to meet the highest standards of safety, quality and ethics

About Dimplex

For nearly 70 years Dimplex has built a portfolio of over 700 affordable and attractively-designed heating solutions that are efficient, reliable and durable.

This unrivalled experience, combined with our unmatched reputation for quality and innovation is why we remain the market leader in the electric heating world.

We offer products to suit both domestic and commercial applications, across a wide range of categories that are easy to install and readily available from your local wholesaler today.

- ✓ The world's largest electric heating appliance manufacturer
- ✓ Award-winning customer services team
- ✓ Our associations include: ECA, EDA, BEAMA and HEVAC
- ✓ We produce BEAB-approved products—the highest safety standard in the UK
- ✓ Maintenance free products available
- ✓ Easy to install, setup and use
- ✓ We offer a free heating design service

Driven by knowledge and innovation

The Glen Dimplex Heating & Ventilation brands, with their extensive experience and ever-increasing collective product portfolios, assist and excel in new build specification, refurbishing and upgrading of residential, commercial and public-sector buildings.

Our popular brands make us the market leader in electric heating appliances in Europe and a leading player in decorative electric and gas fires and solid fuel stoves. Glen Dimplex Heating & Ventilation's focus is the design, development and manufacture of professionally installed heating and ventilation systems for residential and commercial buildings, ranging from smart electric heating systems using the latest control and communications technologies, through to heating, cooling and ventilation systems, encompassing heat pumps, Mechanical Ventilation and Heat Recovery (MVHR) systems and a range of heat emitters.

In the electric heating industry, our brands' portfolios include the UK's most popular ranges of storage and panel heating, expertise in portable heating solutions and an impressive variety of innovative gas and electric fires. In ventilation they cover domestic and commercial ventilation systems for single rooms or entire buildings as well as portable air treatments. And from their work in hot water solutions; our brands have developed various instantaneous and stored hot water systems, suited to both consumer and professional needs.

A Name You Can Trust

We are proud of our long-standing relationship with the trade and our tradition of developing bespoke heating solutions for your customers, providing great value for money, impressive reliability and outstanding customer service.

Our products, your benefits.

Tried and tested technology

All Dimplex products are designed to meet the latest international performance and safety standards. They are subjected to rigorous testing and evaluation using state-of-the-art facilities that recreate challenging environments to ensure our products perform – every time.

Standard Assessment Procedure (SAP)

Dimplex offers electric heating solutions that can make gaining SAP compliance in multiple dwellings easier than you might think. For example the Dimplex Quantum could improve a properties SAP rating by as much as ten points.

Customer service

When you choose Dimplex, you have the support of our experienced award winning customer service team, as well as backup provided by our national network of specialist service engineers.

Free design service

Our in-house design team can provide detailed plans for the application of our technologies which are specific to an individual property.

These include full heat loss calculations, energy saving estimates, plus a complete product and accessory specification.

Wide distribution network

Our wide distribution network utilises our national and regional partners to ensure full product availability through national and independent distributors.

Product Guarantee*

For extra peace of mind, Dimplex offers comprehensive product warranties to ensure continued performance and protection against manufacturing defects. Dimplex Quantum has a 10 year Guarantee and all EC-Eau cylinders have a 25-year guarantee for the inner cylinder.

* Terms and conditions apply.

Ecodesign Regulations

Electric heating is changing. Just like light bulbs and gas boilers, new regulations are redefining the technology that can be sold in the UK. Here's what you need to know about the changes:

What is the Ecodesign Directive?

The Ecodesign Directive sets minimum specification requirements for products that consume energy. It aims to deliver more energy efficient products and reduce their energy consumption.

How does it work?

Ecodesign provides minimum requirements that products must meet if they are to continue to be sold. This meant that manufacturers had to either update their products to comply with the new regulations, or discontinue them and replace them with more efficient technologies.

What is Lot 20?

Lot 20 is the section of Ecodesign that deals specifically with electric space heating.

When did it start?

Since 1st January 2018, electric space heating products manufactured for sale in the UK have had to comply with this new minimum efficiency rating for their category.

Which products are affected?

The legislation affects the following, and there are slightly different requirements for each category:

- Storage heating
- Direct acting heating (panel heaters and electric radiators)
- Portable heating
- Infra-red heating

All Dimplex products comply with these new requirements.

How does this affect you?

Lot 20 affects everyone manufacturing and selling electric heating products in the UK. Non-compliant products are no longer manufactured, but are still being sold until they are cleared through the market. This means that you need to change the products that you buy, install and recommend as the new regulations have come into the market.

For more information on this subject please visit: www.lot20.co.uk

Types of Electric Heater

Many people are still unclear as to the types of electric heating system available, and the meters and tariffs that they use. There are two basic technology types, direct-acting heating and storage heating.

To avoid recommending the wrong type of heater for a property it is important to understand the basic operation of these two technologies. For example, changing an old storage heater to a direct-acting heater could significantly increase the cost of heating that room, and if the meter were also changed from dual to single-rate the cost of the whole properties hot water and night-time appliance use would also go up.

Direct Acting

Direct-acting heaters use peak-rate electricity to heat a space. These are also known as panel heaters, electric radiators, aluminium radiators or oil-filled radiators, depending on the technology used to house the element. These heaters are all 100% efficient at the point of use and will cost the same amount to run, as they convert peak-rate electricity into heat when it is needed, through a single-rate electric meter.

These units are perfect for new-build and well-insulated properties, or rooms that have low or occasional requirements for use such as bedrooms, studies and light commercial spaces. They are also ideal for use within a building that does not have a dual-rate (off-peak) electric meter.

Storage Heating

Storage heaters use off-peak energy (costing around half that of peak rate energy per kW) to heat a space. These heaters take energy in at night and store it ready for use the next day. Storage heaters are cheaper to operate than direct-acting heaters because they use energy taken in during the off-peak (cheaper) periods. They can do this because of a dual-rate electric meter, which provides electricity at two rates/prices (peak and off-peak). This often means that the hot water needs of the property are met using cheaper electricity, as well as any appliances that are used during these off-peak times.

High Heat Retention Storage Heating (HHRSH)

The modern replacement option for traditional storage heaters, high-heat retention storage heaters use the latest technology to store heat for longer and release it only when it's needed.

High Heat Retention Storage Heaters are the cheapest way to heat a room electrically for 24hrs, and replacing traditional storage heaters with HHRSH units in a property will improve the EPC rating, running cost, comfort and control offered by the system.

Whole House Heating

Q-Rad

Electric radiator

Controls

Digitally controlled electronic thermostat accurate to (+/-0.2°C).

Timer Modes: User Timer.

Pre-programmed Timer Modes: Out All Day, Home All Day, Away.

Continuous: Manual, Eco, Off, Frost Protect.

- Graphical display with RGB backlight
- Capacitive buttons with audio feedback
- User replaceable battery (coin-type)

Controller Functions

- Open window detection
- Adaptive start
- Advanced time period for timer operation
- Adjustable max set point range (7-32°C)
- Bluetooth for software updates
- Child lock

Safety Features

- Two auto reset cut-outs, one for each element
- Thermal fuse protection on front element

Colour/Finish

Metal Chassis, Air outlet Grille & Control Moulding - Traffic White (RAL9016).

Element

Convection - Tubular element with aluminium coated fins for improved convective performance.

Radiant - Cable on foil element. Silicone insulated heating cable on an aluminium sheet.

Supply

- 1.3 metres fitted, 3 core for fused spur installation
- 1/N/PE ~230-240V, 50Hz Class I with earth wire

Guarantee

2 year UK manufacturer Guarantee.

IP Rating

IPX4

Zones:

Installation

Zone 0

This zone requires a minimum of IP67.

Zone 1

Requires a minimum of IPX5. This is the area directly above a bath or within a shower cubicle.

Zone 2

Same as above, requires a minimum of IPX4.

Outside of Zones

For areas outside of these zones (previously known as Zone 3), normal rules apply and no IP rating is required.

DAB

Commercial air curtain

Controls

- Supplied with wall controls
- Master / slave (daisy-chain) connection for single control over a maximum of 10 units as one

Controller Functions

Twin fan speeds, Twin heat settings, Fan run-on circuit (3 mins), BMS/BEMS links, door sensor connections, thermostat connections, Built-in tamperproof thermostat with control wheel / Aux input for interlocks.

Safety Features

- 2 x manual reset cut-out (1m & 1.5m)
- 4 x manual reset cut-out (2m)

Colour/Finish

Pure White (RAL9010) with light grey grilles. Steel & ABS construction.

Supply

400V -3PN.

Guarantee

3 years UK manufacturer Guarantee.

IP Rating

IPX0

CFH

Commercial fan heater

Controls

Low voltage master/slave system using CAT 5 PC network cable to offer system control over a maximum of 10 heaters.*

Controller Functions

- Off / fan & two heat settings
- Multi-functional digital control over time / thermostat / runback / programme / heat fan*

Safety Features

Manual reset cut-out.

- CFH60 - 85°C
- CFH90/120 - 115°C

Colour/Finish

Powder coated steel with plastic mouldings. White with black grille and bracket.

Supply

400V ~3PN.

Guarantee

1 year UK manufacturer Guarantee.

IP Rating

CFSE

Commercial fan heater with remote

Controls

Digitally controlled, accurate electronic thermostat.

Timer Modes: 7 Day Programmable User Timer.

Continuous Heat Modes: Manual, Runback, Fan Only, Off.

Bluetooth remote supplied with product as a standard.

Controller Functions

- Adaptive start
- Advanced time period for timer operation
- Adjustable max set point range (7-32°C)
- Bluetooth for control
- PIN Lock

Safety Features

- Electric reset cut-out (CFS30E) (115°C)
- Manual reset cut-out (CFS60E) (85°C)

Colour/Finish

Traffic White (RAL9016) with black grille bracket.

Supply

- 1.3 metres fitted, 3 core for fused spur installation
- 1/N/PE ~230-240V, 50Hz Class I with earth wire

Guarantee

2 years UK manufacturer Guarantee.

Dimplex Control

Control and monitor your heating and hot water with Dimplex Control. Group heaters into zones to easily control and track their energy usage. Any time. Anywhere.

Spot faults and manage multiple sites, remotely, all from one app. Forgot to turn the heating off before going on holiday? Want to make sure a minimum temperature is maintained? Now your heating is never out of reach.

Your privacy and security are paramount. Dimplex Control is built on the Microsoft Azure Cloud platform, with end-to-end encryption between the cloud and your devices.

- Zoned control - Quickly view and change heating mode
- Easy set-up - The app features a step-by-step setup wizard so you can start using the system quickly without having to leave the app.
- Control your hot water - See how much hot water is available at the set temperature (Requires a compatible Dimplex Quantum Water Cylinder QWCd)
- Monitor energy usage by heater, zone or site with an hourly, 7 day, 28 day and annual view
- Remote access - Monitor and control your heating from anywhere in the world using the Dimplex Control app and a mobile data connection.
- Support - See faults reported on the app and request help using service mode

Dimplex Hub

*Only supported products are compatible. Check dimplex.co.uk/control/compatibility

I/O

Connection to devices

- 868MHz low band RF, AES-128 encrypted
- 1x RS485 port

Internet connection

- 2.4Ghz Wi-Fi b/g/n, WEP, WPA, WPA2 support
- 1x RJ45 Ethernet port 10/100Mbps

Range

- 20m depending on environment*

*No. of walls, wall construction, noise on operating frequency etc. will effect range.

Max. connections per Hub

20 devices per Hub.

Colour / Finish

Moulding - Traffic White (RAL 9016).

IP Rating

IP 20

Heater Sizing Tables

These tables provide heater-sizing guidance for traditional electric heating systems, including Quantum, storage heaters and panel heaters.

For single properties please complete a heat design form (page 86) and send it with a sketch plan to our heating design department. We aim to provide this accurate assessment within seven working days. For multiple properties, please send us comprehensive scale drawings (scale 1:50 or 1:100) together with construction details and any other relevant information. We offer a fourteen working day service for this type of assessment.

Living or dining room: Quantum off-peak heaters are recommended

Heater loading in kW. Temperature 21°C

Floor area	Solid walls No. of outside walls			Cavity walls No. of outside walls			Insulated cavity walls No. of outside walls		
	1	2	3	1	2	3	1	2	3
m ²									
12	1.84	2.16	2.88	1.60	1.92	2.48	1.12	1.28	1.68
16	2.08	2.48	3.20	1.84	2.32	2.88	1.36	1.60	1.92
20	2.64	3.12	3.92	2.32	2.72	3.44	1.68	1.92	2.32
24	2.96	3.44	4.32	2.64	3.12	3.76	2.08	2.32	2.64
28	3.28	3.92	4.80	2.96	3.44	4.24	2.16	2.48	2.96
32	3.52	4.32	5.28	3.28	3.76	4.72	2.40	2.72	3.20

Bedrooms: panel heaters are recommended

Heater loading in kW. Temperature 18°C

Floor area	Solid walls No. of outside walls			Cavity walls No. of outside walls			Insulated cavity walls No. of outside walls		
	1	2	3	1	2	3	1	2	3
m ²

Bathrooms

Any electrical appliances installed in a bathroom should be fitted by a competent electrician in accordance with the current I.E.E. Regulations.

Safety

Dimplex products are designed to comply with the requirement of EN60335 part 1 of the British Standard covering the safety requirements of electric heating appliances, and momentary contact with any part of the heater should not cause injury. However, in order to be effective, heaters or towel rails of any type do get hot especially (if applicable) around the air outlet grille. Therefore if aged or infirm persons, or young children, are likely to be unsupervised in the vicinity of a heater we advise precautions should be taken. We recommend a guard is fitted around the heater, as is normal with many types of heating appliance in similar circumstances, to ensure contact with the heater is avoided and objects cannot be inserted into the product. Heating appliances should never be covered or positioned where objects may fall onto them.

Plugs

All portable appliances are supplied with a fitted plug. We do not recommend using an extension lead with our products.

Specifications

Dimplex policy is one of continuous improvement; we reserve the right to alter specifications without notice. Although every care has been taken in the reproduction of product finishes in this brochure, the colour photographs should be taken only as a guide. The information contained in this brochure is correct at the time of printing. You are advised to consult your dealer before purchasing.

Installation Guidance

This brochure is not intended as an installation guide. For safety, products should only be installed by a competent person, in accordance with current regulations and the manufacturers instructions. Please note that the dimensions contained within this brochure do not in all cases include clearances required around installed products for safe operation.

The Dimplex Range

Dimplex offers the widest range of electric space heating solutions in the UK. In addition to this publication, we have a number of more focused brochures as shown below. These can be ordered via our website. www.dimplex.co.uk
